

## Kali Linux VM Setup:

Download **kali-linux-2023.2-vmware-amd64.7z** from below **Kali.org** Link:

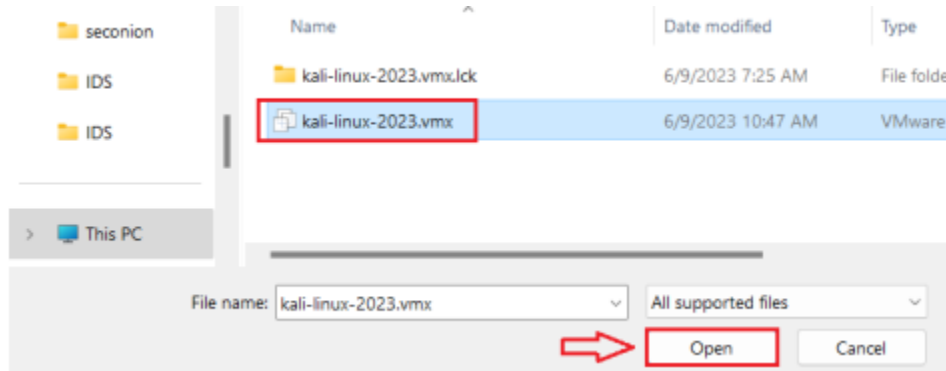

<https://www.kali.org/get-kali/#kali-virtual-machines>

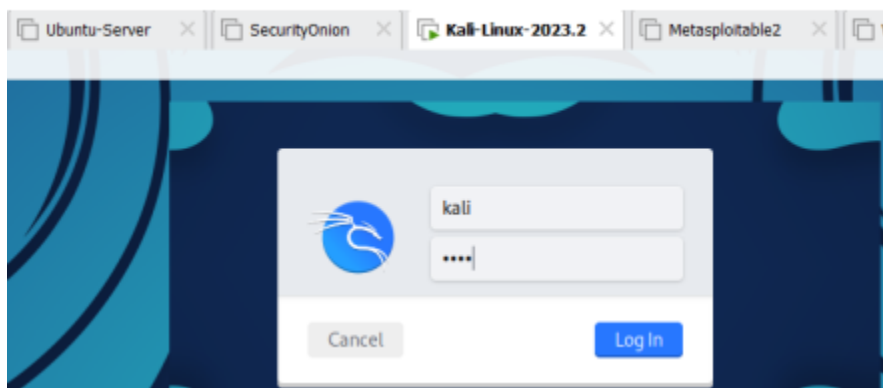

I have downloaded x64 amd

After extract Zip file and you can open it from Workstation without creating new Window

Username	kali
Password	kali

After you enter Kali and configure whatever you want, we can use this machine as an attacker's machine
